CRIME

IN

SOUTH

CAROLINA

2019

INTRODUCTION

The 2019 edition of *Crime in South Carolina* contains general information about crime trends, provides crime data at the county level for the most recent year available, and provides descriptive information about criminality. This publication intends to provide statistical information about crime in the state simply and straightforwardly so that it can better inform policymakers, criminal justice practitioners, and researchers, as well as the public.

The information presented in the tables, graphs, and charts in this publication indicate volume, fluctuation, and distribution of crime in South Carolina based on incident reports submitted to the State Law Enforcement Division (SLED) by state and local law enforcement agencies. These reports are edited and reviewed, corrected as needed, and compiled to form the basis of the information presented in this report. It is important to note that the information contained in this report is only as complete and accurate as the information submitted to SLED. Accordingly, unreported crimes are not included.

Additionally, edits, updates, and corrections can be submitted to SLED at any time, providing agencies with the opportunity to report as thoroughly and accurately as possible. As a result, rates and totals from a specific year can vary from previously published totals for that same year. The data used for this report were current as of August 24, 2020. Any data published here concerning figures for prior years supersede those published in previous reports. The sum of categories for some tables, charts, or graphs may not total 100% due to rounding or the ability to submit multiple values for certain fields. The percent change in the rate per 10,000 inhabitants (or juveniles) is calculated from unrounded rates that are not displayed in the tables.

A great deal of thanks and appreciation is due to the sheriffs, chiefs of police, directors, state and local law enforcement officers, and administrative staff whose hard work gathering, reviewing, and submitting crime and arrest data to the South Carolina Uniform Crime Reporting Program made the publication of this report possible. The report itself is the product of a collaborative relationship between the SLED Uniform Crime Reporting Program and the South Carolina Statistical Analysis Center located within the South Carolina Department of Public Safety's Office of Highway Safety and Justice Programs.

TRANSITION TO INCIDENT-BASED REPORTING

In 1991, South Carolina became one of the first states in the country to implement an incident-based reporting (IBR) system certified by the Federal Bureau of Investigation (FBI). This new system expanded on the previous Summary Reporting System (SRS) by requiring a higher degree of detail in reporting. Whereas the SRS collected only eight Part I crimes (murder, rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson), the South Carolina Incident-Based Reporting System (SCIBRS) currently collects in-depth data on 59 Group A offenses.

Additionally, the older Summary system allowed only the single most serious offense in an incident to be reported; any other offenses in the incident—and the information associated with them—were not collected. Initially, the SCIBRS allowed up to five separate Group A offenses to be reported in each incident, collecting data on the offense characteristics, property, victims, offenders, and arrestees associated with each crime. As of January 2017, the SCIBRS now allows the reporting of up to ten separate Group A offenses in each incident.

While enough data was being collected through the new system to allow for historical trend reporting, SCIBRS data continued to be converted back to Summary for publication in *Crime in South Carolina*. The conversion of SCIBRS data helped facilitate the comparison with the FBI's statistical crime publications—such as *Crime in the United States*—that converts all IBR data to Summary.

Crime in South Carolina, 2019 will be the seventh edition to feature IBR data exclusively. Because of the significant differences between Summary data and SCIBRS data, any comparisons between the figures published here in *Crime in South Carolina, 2019* to those released in Summary publications such as *Crime in the United States* or editions of *Crime in South Carolina* before 2013 are strongly discouraged.

In this edition of *Crime in South Carolina*, the number of Breaking & Entering (B&E) crimes is calculated differently than previous years. Previous editions used a counting methodology similar to the FBI's *Crime in the United States* publication. One B&E was counted per incident, except when a hotel/motel or rental self-storage facility was broken into. In those types of incidents, the number of rooms/units broken into were counted instead.

This edition uses the same methodology as the FBI's *NIBRS* publication. Only one B&E is counted per incident, regardless of location type. With the planned sunsetting of SRS at the end of 2020, and the likely shift in focus from *Crime in the United States* to the annual *NIBRS* publication, this updated method for calculating B&E will help facilitate comparisons to future FBI publications.

Because B&E is one of the offenses that make up the Property Crime category, the number of Property Crimes is also affected. All figures in this edition were calculated by applying the updated methodology to the data from all years included in this edition: 1991–2019. Only the number of crimes is calculated differently; arrest figures are unaffected by this update. Any comparison between the number of crimes for the B&E offense and the Property Crimes category published here in *Crime in South Carolina, 2019* to those released in previous editions is strongly discouraged.

DEDICATION

This report is dedicated to all law enforcement officers—and in particular—to those who died in the line of duty serving the citizens of South Carolina. One officer died in the line of duty in 2019:

Private First Class Michael Latu, Marion County Sheriff's Office, December 17, 2019

Information regarding deaths in the line of duty was furnished by the South Carolina Law Enforcement Officers Hall of Fame.

TABLE OF CONTENTS

INDEX OFFENSES

The following Part I offenses – murder, sexual battery, robbery, aggravated assault, breaking and entering, motor vehicle theft, larceny, and arson – make up South Carolina's crime index. These are typically categorized as violent (murder, sexual battery, robbery, and aggravated assault) and property (breaking and entering, motor vehicle theft, larceny, and arson) and provide necessary measures of crime. Throughout this report, crimes are usually presented either as the number of reported offenses or as the rate of offenses per 10,000 units of population. Because it takes into account population, the crime rate usually provides the most useful basis of comparison over time or among jurisdictions or other geographical groups. The formula for calculating a crime rate is as follows:

$$Crime\ Rate = \frac{Number\ of\ Crimes}{Population} \times 10,000$$

State and county population estimates used to calculate crime rates were acquired from the Missouri Census Data Center (http://mcdc.missouri.edu).

Clearance rates provide a measure of the degree to which crimes are resolved. These are calculated using the following formula:

$$Clearance\ Rate = \frac{Number\ of\ Crimes\ Cleared\ by\ Arrest\ or\ Exceptional\ Means}{Count\ of\ Crimes\ Reported}$$

South Carolina's murder rate increased by 6.7% from 2018 to 2019. The state murder rate decreased by 25.4% since 1991.

MURDER: Murder is the willful killing of one person by another. The classification of this offense is based on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or another judicial body. Deaths caused by negligence, suicide, accident, or justifiable homicides are not included.

York County	9	0.3	55.6%

South Carolina's sexual battery rate decreased by 7.5% from 2018 to 2019. Since 1991 the sexual battery rate decreased by 30.4%.

SEXUAL BATTERY: Sexual battery is the penetration—no matter how slight—of the vagina or anus with any body part or object, or the oral penetration by a sex organ of another person, without consent of the victim. It includes both male and female victims of rape, sodomy, and sexual assault with an object. Statutory rape and other sex offenses are not included.

South Carolina's larceny rate decreased by 4.4% from 2018 to 2019. From 1991 to 2019 the larceny rate decreased by 37.9%.

LARCENY: Larceny is the unlawful taking of property from the possession of another. It includes shoplifting, pocket-picking, purse snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, and other thefts without force, violence, or fraud. It does not include embezzlement, con games, forgery, bad checks, or motor vehicle theft.

ARRESTS

Arrest counts provide a measure of law enforcement's response to crime. Arrest rates also offer estimates of criminal offenses such as liquor law violations or driving under the influence for which there are no victims who are likely to report the behavior. Arrest practices, policies, and enforcement emphases vary from place to place and even within a community over time. The arrest practices for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies. But the methods for robbery, burglary, and other serious crime arrests are more likely to be uniform and consistent throughout all jurisdictions. Uniform Crime Reporting procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested, because one person may be apprehended several times during the year for the same or different offenses.

Until July 1, 2019, state law set the age of adult responsibility in most criminal matters at seventeen years of age. The adult arrest totals in previous editions were calculated based on the adult age (17 and older) at that time. In this edition, the current definition of an adult (18 and older) is used in the Adult Arrestees by Sex and Adult Arrestees by Race tables of this section. Due to this change, comparisons of the two affected tables to those published in previous editions of *Crime in South Carolina* is strongly discouraged. All other tables in this section include all arrestees, regardless of age.

In this report, arrests are presented as the actual number of arrests or as arrest rates per 10,000 units of population. Arrest rates are calculated using the following formula:

$$Arrest\ Rate = \frac{Number\ of\ Arrests}{Population} \times 10,000$$

State and county population estimates used to calculate arrest rates were acquired from the Missouri Census Data Center (http://mcdc.missouri.edu). Arrest data for 2001 are not available and are not included in any of the data tables or charts that follow.

See page 40 for information on the recent change in juvenile age.

JUVENILE ARRESTS

In addition to being a gauge of law enforcement's response to crime, arrests provide reliable information concerning the age of apprehended offenders. Consequently, arrest rates by age provide one of the better readily-available measures of juvenile delinquency. SCIBRS procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. As a result, annual arrest figures do not measure the number of individual juveniles arrested, because one juvenile might be apprehended several times during a year.

Until July 1, 2019, state law set the age of adult responsibility in most criminal matters at seventeen years of age, so the juvenile arrest totals in previous editions were calculated based on the juvenile age (0 through 16) at that time. In this edition, the current definition of a juvenile (0 through 17) is used for all figures in this section, including historical data starting in 1991. Due to this change, comparisons of the figures in this section to those published in previous editions of *Crime in South Carolina* is strongly discouraged.

$$Juvenile\ Arrest\ Rate = \frac{Count\ of\ Juveniles\ Arrested}{Juvenile\ Population} \times 10,000$$

State and county population estimates used to calculate arrest rates were acquired from the Missouri Census Data Center (http://mcdc.missouri.edu). Arrest data for 2001 are not available and are not included in any of the data tables or charts that follow.

In 2019, 27 juveniles were arrested for murder compared with 31 juveniles who were arrested for murder in 2018.

MURDER: Murder is the willful killing of one person by another. The classification of this offense is based on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or another judicial body. Deaths caused by negligence, suicide, accident, or justifiable homicides are not included.

FAMILY AND INTIMATE VIOLENCE

This section examines murder, aggravated assault, simple assault, and intimidation involving victims and offenders who have either a familial or romantic relationship with one another. The victim-to-offender relationship might best be understood as describing who the victim of the assault was. For example, if the victim-to-offender link is "child," then the victim was the child, and the offender was a parent. Familial relationships are defined as including the following victim-to-offender relationships: child, stepchild, grandchild, sibling (brother or sister), stepsibling, parent, stepparent, grandparent, in-law, and other family members. Intimate relationships are defined as including the following victim-to-offender links: spouse, ex-spouse, cohabitants, ex-cohabitants, child-in-common, boyfriend/girlfriend, and same-sex relationships.

Victims must be reported with their relationship to each of the offenders in the incident. When an incident has multiple offenders, individual victims will be reported with various relationship types. Because an individual victim may be reported with various relationship types, any single victim could contribute to the number of victims for more than one relationship type. For example, if a victim was the child of one offender and the sibling of another, that victim will contribute both to the number of victims who were children of an offender and to the number of victims who were siblings of an offender. Because individual victims appear in multiple relationship types, the percentages in the tables will add up to more than 100% of total victims.

In January 2017, SCIBRS began collecting cohabitants, ex-cohabitants, and child-in-common victim-to-offender relationships at the recommendation of the South Carolina Domestic Violence Task Force. Additionally, in January 2019, SCIBRS started to collect ex-boyfriend/girlfriend victim-to-offender relationships as a new requirement set by the FBI. The links described with these new values would have previously been reported to SCIBRS under the boyfriend/girlfriend victim-to-offender relationship. The boyfriend/girlfriend relationship remains available to report current dating relationships that are more than casual.

In January 2017, SCIBRS also began collecting same-sex victim/offender pairs under any intimate victim-to-offender relationship at the recommendation of the FBI. These relationships would have previously been reported under a dedicated same-sex relationship value.

There were 39 victims of murder in 2019 who had a familial relationship with an offender.

Note: SLED works closely with law enforcement agencies throughout the year to facilitate timely and accurate data submissions. Nonetheless, at times, jurisdictions experience technical issues that affect the annual totals reported here. SLED continues to add to and correct data that may alter totals in future reports.
